

Manually Registering an OutputHoss.dll File

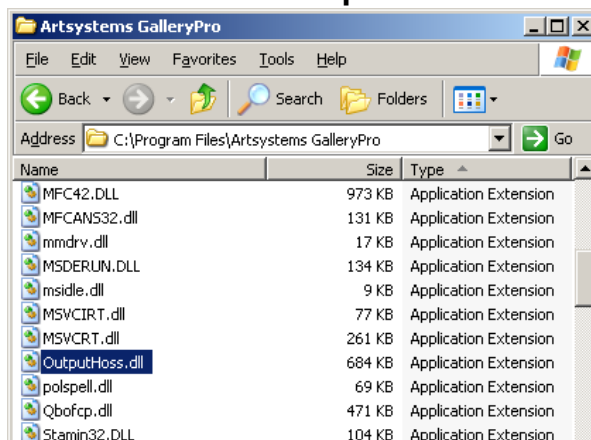

WINDOWS XP

MANUAL FILE REGISTRATION

1. Using Windows Explorer or My Computer, locate and open your local *Artsystems GalleryPro* folder. Adjust the window size to fit approximately 1/4 of your screen.

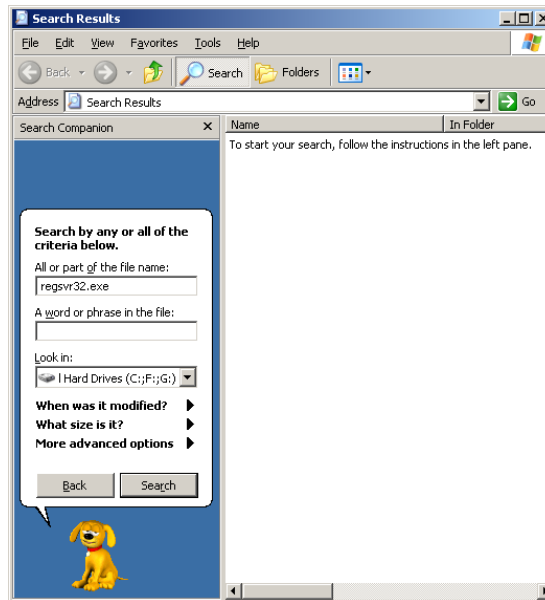

2. Locate the file called **OutputHoss.dll** in the *Artsystems GalleryPro* folder.

3. If the file was downloaded from the *Artsystems* Web site, save or copy it into the *Artsystems GalleryPro* folder.

4. Click the Start button (lower left), select **Search**, select **All Files and Folders**.

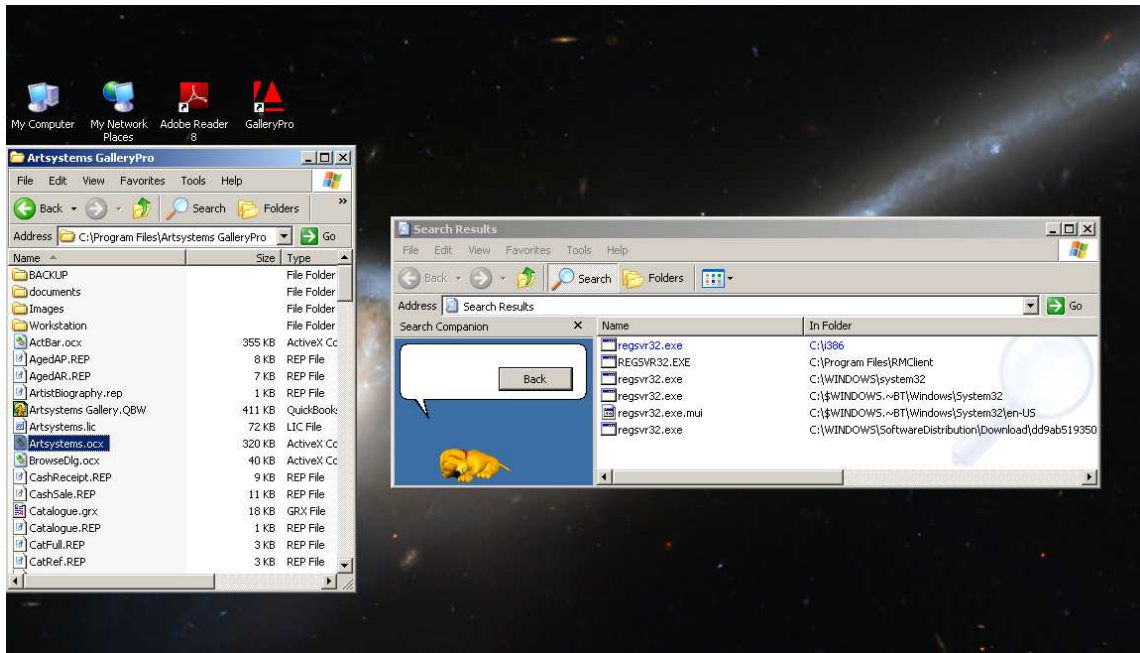

This enables a Search by any or all of the criteria below window. **In the All or part of the file name window**, search your hard drive(s) for the file named **regsvr32.exe**.

5. Click the Search button and the resulting search will look something like this (Windows XP Pro):

6. There may be more than one regsvr32.exe found. In **Windows XP** use the one located in **C:\WINDOWS\System32**.
7. In the *Artsystems GalleryPro* window, locate the file **OutputHoss.dll** and position your mouse pointer above it.
8. Select the file **OutputHoss.dll** (left-click and hold button) and drag it on top of the **regsvr32.exe** file (release mouse button when regsvr32.exe turns blue).

9. Completion of the registration process will be indicated by the successful registration notification box (below). Click OK, then close the Find: All Files window and the Artsystems GalleryPro window. Open the Artsystems program (as you normally would) and test the issues that were not permissible earlier because of the absence or incorrect registration of the system file.
